Revolutionary All-Natural Product Animal-Organ Extract

**TOPDRESSING
GK365**

- Improves disease resistance and cold resistance
- Excellent for strong flower budding and blossoming
- Excellent for flower colour and richness
- Halts summer stagnation and promotes recovery of tree and lawn growth
- Promotes greening • a good supplement for poor lighting conditions
- Raises sugar content • good for germination and extension
- Supports development of beneficial microorganisms around roots
- Increases growth of bulbous plants • produces an excellent harvest of fruit

Guaranteed Contents ★ **N3★P6★K5**
Includes amino acids, nucleic acids, organic acids, and trace elements

170g • 460g • 2.3kg • 12kg

FEATURES

- with TOP DRESSING, effects can last from 20 days to 1 month
- this natural animal-organ extract fortified with amino and nucleic acids promotes plant nutrition and reproductive growth while preventing overgrowth. This product is effective in every area of plant cultivation
- promotes the development of beneficial microorganisms around the roots of plants and increases root strength and growth to enable optimum absorption of nutrients
- visibly improves the luster and colour of leaves and flowers
- Prevents wilting, liverwort, mildew, various bacteria, diseases and parasites**
- 5 to 7 days after spraying or infusing the soil, the luster and green colour of leaves will visibly improve as plants becomes revitalized
- eliminates summer-stunted growth - growth is stabilized, hardiness is improved
- When applied before and after planting seeds or transplanting, growth is enhanced by up to 2 to 3 times; the growth period between planting and flowering or harvest is reduced by 15 to 20 days. It is also very effective for increasing the number of stocks or stems.
- wards off acarid infestation in bonsai and azalea.
- improves budding - prevents drooping
- when the plant is sprayed or the soil is infused, protects against stunted growth due to low light-level conditions or indoor cultivation
- spraying or infusing into the soil before flowering improves flower texture, colour, and richness
- sprayed or infusing into the soil before ripening improves colour, luster and taste of fruit - sweetness increases
- regular application on plants or tree soil infusion will maintain the plant or tree's shape and will improve resistance to disease and cold (hardiness)
- promotes enhanced growth of bulbous plants
- infusing the soil or spraying orchids will speed up flowering - stem height and diameter are improved as well as the number, richness and colour of flowers
- time between planting and blooming is sped up by 2 to 3 times
- protects against mites - in fruit trees, fruit and vegetable crops and rice fields, wards off stink bugs

PROPER USE Use 500 strength when replanting azaleas or bonsai trees. Immersing the roots is good for both germination and growth.

TOP DRESSING Spray on or infuse into the soil.
For outdoor cultivation use: For indoor cultivation use:
300-500-800 strength **500-800-1000 strength**
 Spray or infuse into soil every 10 days, 20 days or monthly, for each of the 3 strengths respectively.
Mixing ratios: (per 10 liters of water)
 N.B. DILUTE IN WATER BEFORE USE
 33cc...300 strength; 20cc...500 strength
 12.5cc...800 strength; 10cc...1000 strength
 The mixing ratio varies according to area of application, temperature and plant species.

Spray 2 to 3 times during the growing season
 Spraying a seedling with **300-500-800** strength or using soil infusion will help promote resistance to cold and disease.
 Infuse into soil or spray onto dying plants to restore vigor once every 7-10 days or 3 times a month.
 Bonsais, azaleas, trees and roses: use **300-500 strength**
 wild grass, orchid ebines: **500-800-1000-2000 strength**

Using TOP DRESSING, DONTOKOI, GREEN KING, GREEN SOFT and GK MIX jointly can have a synergistic effect and increase plant growth significantly.

PRECAUTIONS FOR USE

- During seasons when there are excessively hot temperatures, be sure to dilute before use.
- Do not spray on petals that have bloomed, However, this product may be sprayed on leaves or infused into the soil.
- This product may be mixed with pesticides, but avoid mixing with alkaline-type pesticides.
- Do not return mixed solutions to the original container.
- Use with a spreading agent. ●Use within 3 days of mixing.
- Please **shake well before use**. The natural organic components of this product have a tendency to settle to the bottom of the container. This does not affect the quality of this product.
- When stored for a long period of time, the colour will change. This does not affect the effectiveness of this product. **Storage: Store in a cool, dark place. Do not place in direct sunlight.**

Manufacturing data: A balance of amino acids, nucleic acids and organic acids formulate this top quality **natural animal-organ, organic-matter** product. Over 50% organic, this revolutionary product uses newly developed technology

Also for use on home gardens.

CAUTION This product is harmful if swallowed. Please keep away from children. Do not feed to dogs, cats, birds or fish.
Please read instructions carefully before use.

GREEN KING

FEATURES

1. No more outbreaks of maggots or slugs · No more damage caused by sparrows
2. Only small amounts need to be applied ... less than half the amount of other fertilizers
3. No odours · no fermentation gases are produced · best used indoors
4. Visible results ... the colour of leaves is richer and more pleasing to the eye
5. Easy to apply · a natural animal-organ extract in granular pellets
6. Easier to use · penetrates into the soil · farm applications · for potted pots
7. Vitalizes the growth of roots · activates beneficial soil bacteria
8. Recovery of grass and tree growth as roots get nutrition and grow healthier
9. A quality, economical fertilizer · Effective protein is a main constituent
10. Contains trace elements · enhances the synergistic effect of magnesium and other minerals
11. Keeps sphagnum moss from rotting
12. Low tendency to become acidic, hindering yeast fungus activity
13. Highly effective for 60 days after fertilization

• **Safe for home vegetable garden application** •

The use of natural animal-organ extracts when top dressing gives a synergistic effect.

• FERTILIZATION SCHEDULE •

Apply GREEN KING once after germination and again after blooming.

Use once only from mid-August to early-September · Can be used 2 to 3 times annually

- Water sprinkled around fertilized areas reduces odours
- Use once every two months
- After watering, fertilizing with GREEN KING reduces breakdown

- 4 to 10 days after fertilizing in temperatures above 15.C, white streaks may appear. This phenomenon is due to yeast fungi.

Amounts To Use

Number 5 pot (15cm) 3-5g (1-1.5 teaspoons)
 Shaku pot (30cm) 10-15g (1-1.5 tablespoons)
 Mix evenly in the pot soil in 3 to 4 locations.
 Use 1 granule of GREEN KING with wild grasses and orchids in a No. 1 pot (5 granules for a No. 5 pot)
 Use approx. 200g for each 3.3 sq.m. of garden area.
 When used for potted plants, mix 3-5g for every liter of soil.

Manufacturing Data

This product contains natural organic material and has a slight odour.
 This is a newly developed product that utilizes top quality unique natural organic ingredients including steamed bone powder and a well-balanced blend of more than ten 90% organic compounds to fertilize and bring the most out of your plants.

*** Ideal for recycling earth and soil ***

Use DONTOKOI to promote root growth and strength.
 Transplanting bonsai trees and azaleas every 2-3 years is ideal.
 Chrysanthemums and potted plants, 1 liter of earth 5-10g mix.
 Bonsais and azaleas, 1 liter of earth with a 50-100g mix.

After use, put remaining earth into a plastic bag. Mix in Dontokoi at about a 1:10 ratio, add water and store. Usable soil should be created after storing for a reasonable period of time.

GREEN SOFT, TOP DRESSING and DONTOKOI all have synergistic effects when used together

CAUTION This product is harmful if swallowed. Please keep away from children. Do not feed to dogs, cats, birds or fish. This product contains animal proteins. Keep away from livestock. **Please read all product instructions carefully before use**
